Libraries	Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib, Seaborn, NLTK, Optuna
Databases	Oracle, MongoDB
Tools	Git, VS Code, Jupyter Notebook

PROJECTS

AutoDML (Automated Data Mining and Machine Learning) [GitHub](#)

- Designed and developed an end-to-end AutoML pipeline for automated preprocessing, feature engineering, model training, and evaluation.
- Implemented automated model selection and hyperparameter optimization using Optuna.
- Generated reusable prediction pipelines and serialized model artifacts for inference.

Stock Price Forecasting using LSTM [GitHub](#)

- Developed an LSTM-based forecasting model for NSE stock market data.
- Built an interactive Streamlit dashboard for visualization and predictions.
- Implemented preprocessing and sequence modeling pipelines for time-series forecasting.

Global Superstore Data Analysis [GitHub](#)

- Performed exploratory data analysis to identify sales trends, customer behavior, and product performance.
- Built business-focused visualizations and analyzed regional and category-level performance using Python.
- Generated 10+ visualizations to improve business insight clarity.
